Introduction

〇 〇 〇 〇

Introduction

- Gambling behavior: non-gambling > recreational gambling > at-risk gambling > problem gambling (Floros, 2018)
- Problem gambling: difficulties in limiting money and time spent on online gambling (Gainsbury et al., 2013)
- Of the regular gamblers in the Netherlands, 38% are risky gamblers (Bieleman, 2011)
- Young adults are the most vulnerable age group to develop problem gambling behaviors
- **Goal: prevent Dutch young adults from becoming problem gamblers**
- CeHRes Roadmap (van Gemert-Pijnen et al., 2011)

Desk Research

KSA website

Trial of online gambling game

User Research

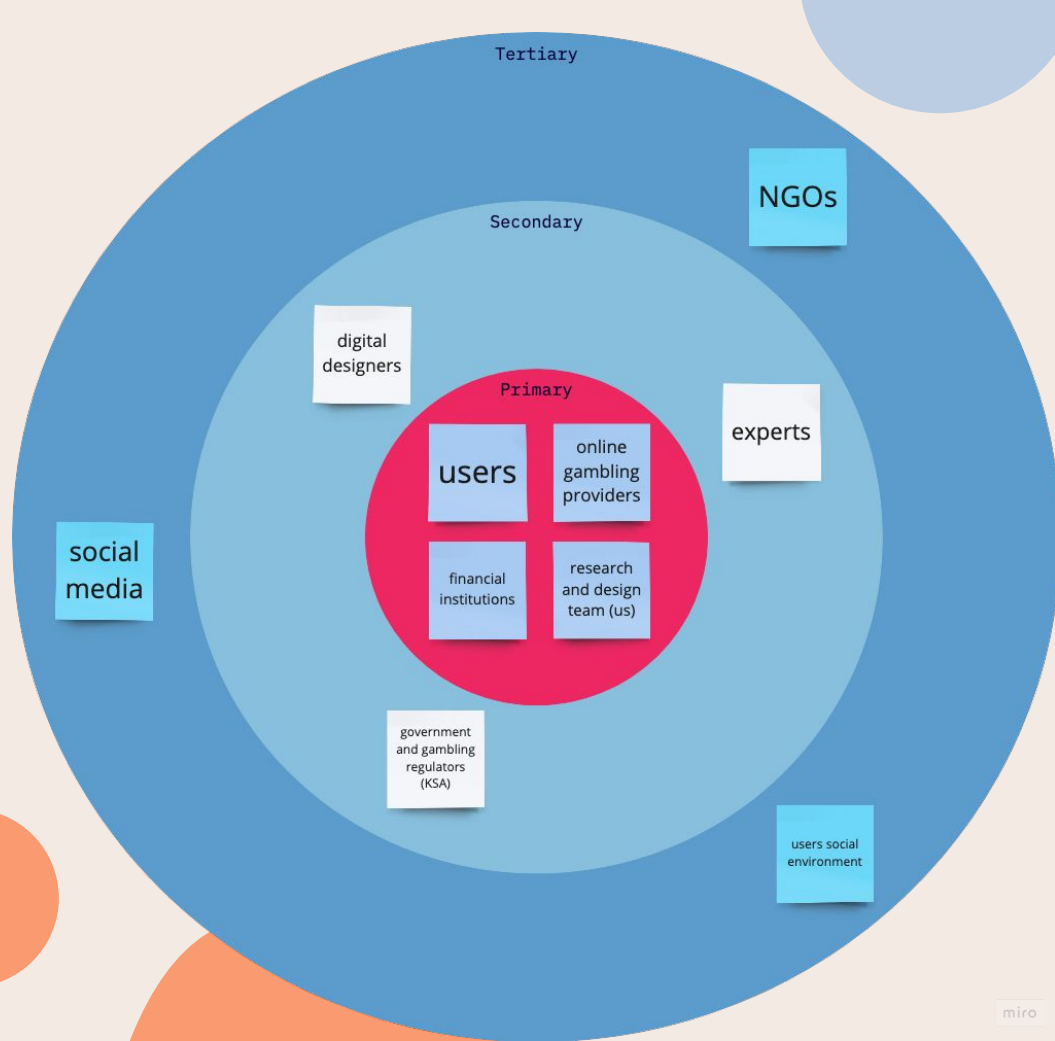

Individual interviews with 2
recreational gamblers

Expert Consultation

Group interview with a
gambling expert

Stakeholders

Current Regulations for Responsible Gambling

Gambling Authority (KSA)

- All gamblers need to be registered
- Problem gamblers can register in the CRUKS list and get banned from gambling platforms for 6 months
- All online gambling providers need to be registered, and licensed, and follow strict rules and regulations (e.g. include responsible gambling features (RGFs))

Player Initiated RGFs

Limit setting
Self exclusion

Externally Initiated RGFs

Imposing limits
Forced exclusion

Information Provision RGFs

Gambling risks
Gambling expenses
Self diagnostic tools
Addiction help

Barriers of Responsible Gambling

Gambling providers

Lack of transparency, communication and centralization of information between

High ethical and legal concerns in dealing with and sharing personal data

Different gambling providers

Each site has their own regulations, thresholds and RGFs

This leads to easy evasion of safety regulations

Financial Institutions

Separate tracking of expenses

This prevents accurate monitoring of gambling expenses, wins and losses

And users' awareness of their gambling problem

miro

Users

Lack awareness and knowledge of safety regulations and RGFs

Lack adherence to RGFs because they can be easily evaded

Lack awareness of their gambling expenses and habits, and their gambling problem

Lack motivation to use RGF because they think they are just for problem gamblers

03

Value specification

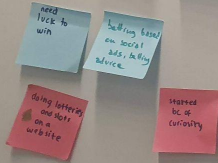

Step 1 - affinity mapping

on post its: desk research, literature search, user research

categorization according to themes
which stood out

understood the values,
attributes, requirements

Step 3 - getting a clearer idea

VALUES	REQUIREMENTS
knowing safety regulation	clarification education
adherence to safety regulations	persuasion
being aware of expenses	expense tracking
being aware of own gambling problem	normative feedback
refrain credit card use	persuasion
refrain use of illegal sites	persuasion

using safe money for gambling (he knows he's responsible)

finally had our values and some requirements

made a table so we could see them more clearly

Knowing safety
regulations

Adherence to
safety regulations

Being aware of
own gambling
habits/activities

Being aware of
expenses

Refraining from
using credit cards

Refraining from
using illegal sites

Knowing safety
regulations

Adherence to
safety regulations

Being aware of
own gambling
habits/activities

Being aware of
expenses

Refraining from
using credit cards

Refraining from
using gambling sites

Uniform approach
by gambling sites

Step 4- finalizing our ideas...

... or so we thought

Knowing safety
regulations

Adherence to
safety regulations

Being aware of
own gambling
habits/activities

Being aware of
expenses

Refraining from
using credit cards

Uniform
approach by
gambling sites

Know safety
risks

Adopting
safety measures

Being aware of
own gambling
habits/activities

Being aware of
expenses

Refusing
using rewards

Uniform
approach by
gambling sites

Targeting the
rational mind

Promoting
autonomy in RGF

Finally...

Being aware of
expenses

Being aware of
own gambling
habits/activities

Uniform approach
by gambling sites

Targeting the
rational mind

Promoting
autonomy in RGF

Gambless app Prototype

Start page

A mobile app login screen for 'gambless'. The screen has a light gray background. At the top center is the 'gambless' logo, which consists of a red circle with the word 'gambless' in a blue, lowercase, sans-serif font. Below the logo is the text 'Sign In' in a bold, black, sans-serif font. Underneath 'Sign In' are two input fields: 'Email' and 'Password'. Both fields have a white background and a light gray border, and their content is masked with asterisks. Below the input fields is a blue button with the text 'Sign in' in white. Under the button are two links: 'Forgot password' on the left and 'Sign up' on the right, both in a blue, sans-serif font. At the bottom is a red button with the text 'Use your Google account' in white. The entire screen is framed by a thin gray border.
